ABOUT ME

I am a developer motivated and passionate about learning new technologies. So far I have developed projects with Javascript, TypeScript, Vue.js ReactJS, Next.js, React Native, Node.js, MogoDB and Firebase.

EXPERIENCE

ATOMIC 32 | 2020 - 2022

Mobile Application Developer (Android and iOS)

At Atomic32, I developed applications for Android and iOS using React Native. I also contributed to the development of an administrative dashboard. I acquired solid skills in mobile app development and worked collaboratively with multidisciplinary teams.

IT NORA | 2022 - 2023

Fullstack web and mobile application developer

My main focus was **mobile app development** using React Native, Node.js and MongoDB, along with implementing Firebase Authentication for user authentication.

In addition, I took on the responsibility of **leading the UI/UX design and user experience** for both the mobile app and the administrative dashboard. My experience in UI/UX design allowed me to create intuitive and attractive interfaces, improving usability and user satisfaction.

I used **DigitalOcean** to carry out the deployment, configuring and managing the servers to ensure efficient and secure operation of the applications.

SKILLS

Web development

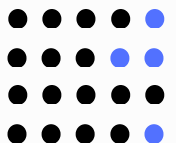

Mobile Development

Backend Development

Passion for design

Technology leader

Empathy

EDUCATION

UNIVERSIDAD POLITÉCNICA DE TLAXCALA

Ing. Tecnologías de la Información - 2022
