José de Jesús Hernández Nava

FULL STACK DEVELOPER

Cellphone: (+55) 246 222 4323
Email: jesus10.hn@gmail.com
Web: https://jesushn.vercel.app/

Full-stack development, with a strong focus on mobile app development using React Native. So far I have developed projects with Javascript, TypeScript, Next.js, React, React Native, Vue.js, Node.js, Python, MogoDB and Firebase tools. My experience in these areas allows me to deliver robust and versatile solutions for a variety of application development needs.

EXPERIENCE

Atomic 32   *2020 - 2022*

Mobile Application Developer (Android and iOS)
At Atomic32, I developed applications for Android and iOS using React Native. I also contributed to the development of an administrative dashboard. I acquired solid skills in mobile app development and worked collaboratively with multidisciplinary teams.

IT NORA   *2022 - Present*

Full Stack web and mobile application developer with a primary focus on mobile app development using React Native, Node.js, and MongoDB. I also implemented Firebase Authentication for user authentication. In addition to development, I took on the responsibility of leading UI/UX design for both the mobile app and the administrative dashboard, creating intuitive and visually appealing interfaces to enhance usability and user satisfaction. I utilized DigitalOcean for server deployment, configuration, and management to ensure the efficient and secure operation of the applications.

EDUCATION

Universidad politécnica de tlaxcala
Ing. Tecnologías de la Información - 2022
